APPENDIX A

FILE TRANSFER PROCESS (FTP)

REPORT DOWNLOADING AND EDS FILE UPLOADS

INTRODUCTION

FHWA has completed an enhancement to FMIS to alleviate some of the operating system dependence (DOS) for downloading FMIS Reports and uploading EDS Files to the FMIS application on the mainframe at TCC. This enhancement integrates Internet technology file transfers (FTP) into the FMIS application. Since many of the Internet Protocols have become evolutionary standards recently, we feel that many more users will be able to perform these FMIS functions, or at least perform them easier. This enhancement is in addition to existing functions and does not disable the previous methodology built into FMIS for file transfers.

CONNECTIVITY

1. Access

To access FHWA FMIS reports or send FMIS EDS Files through the Internet, the user must have access to the Internet. If there is a firewall preventing interactive connections with some sites, the user may want to add Federal Highway Administration's address to your firewalls' permissible site list. The address for Federal Highway Administration's FTP Server is "169.135.1.92". The user can test this by executing the FTP "PING" command.

Ex. C:\> ping 169.135.1.92

If there are results from the "ping" command in the format below, the user probably is able to connect to the FHWA FTP Server without changing any firewall configuration.

**Reply from 169.135.1.92: bytes=32 time<10ms TTL=127
Reply from 169.135.1.92: bytes=32 time<10ms TTL=127
Reply from 169.135.1.92: bytes=32 time<10ms TTL=127
Reply from 169.135.1.92: bytes=32 time<10ms TTL=127**

If NT 4.0 is the operating system, the user already has an FTP client built into the operating system. It is a command line client. If it is too difficult to use, the user can download a free graphical interface that works with Windows 3.1, Windows 95, or NT. It is called WS_FTP and is available on the Internet at http://www.ipswitch.com/downloads/ws_ftp_LE.html. If the organization requires a secure FTP connection, FHWA will supply an additional software client that the user can install on your computer. This will provide end-to-end data encryption using the latest TCP/IP encryption to the DOT network and users can actually telnet to the mainframe from this point, eliminating the need for a 3270 emulator on the client workstation. The security software is called Secure Remote and is installed on FHWA's Internet firewall.

2. Registration

- Secure Remote Client (optional) - This client provides ID, password and encryption from client workstation through the Internet to the DOT Internet firewall. To use this secure connection, the user should contact the FMIS Team at (202) 366-2911 for DOT registration and to obtain the client software.
- Application registration (mandatory)
- When there is an Internet connectivity to FHWA, the user must be registered with an ID on the FHWA FTP Server. Contact the above number to request FMIS registration for **reports** and/or **EDS File transmission**. The FMIS user record will be initialized to direct reports to the FTP Server and/or request that the ID be allowed to send FMIS EDS files to the FTP Server. A directory on the FTP Server for the user will be the same as FMIS mainframe user ID will be created.

Ex c:\ftp\fmis\lf08usr

This process does not disable any previous method of report retrieval or EDS file transmission method that currently use.

APPLICATION

It should be understood that this method of accessing/downloading FMIS reports and/or sending FHWA FMIS EDS files does not replace the need for a 3270 emulator to connect to the FMIS database itself. It does, however, make it unnecessary to use the complex downloading feature of many 3270 emulators for users doing PC to mainframe file transfers.

1. Connecting

By double clicking the WS_FTP program, the user will get a "SESSION PROPERTIES" screen (below left). The user should enter the "Host Name Address" (169.135.1.92), "Host Type" (select Automatic Detect), "User ID" (the same as your current FMIS mainframe user ID), and "Password" (the password supplied by FMIS FTP Application registration). Press the OK button on the "SESSION PROPERTIES" screen and the WS_FTP CONNECTED CLIENT SCREEN displayed below (right) should appear.

2. FMIS Reports

The user should run FMIS reports the same as previously through the 3270 emulator. The only change will be on the status screen in the figure below. The destination field will display "WEB". If the user has 3270 screen and FTP Client active (below), the FMIS Report will appear on the right side of the WS-FTP Client screen. The user does not need to run both applications(3270 emulator and WS-FTP client) concurrently, but can if it is

desirable. The right side shows files that are available on the directory on the FTP Server. The user may view these files or download them. To download, just highlight the file and press the appropriate arrow in the middle. A short cut for downloading is to double click the file.

To conserve disk space on the FHWA FTP Server, please delete any FMIS Report files that have already downloaded or no longer need. To delete a file, just highlight and press the DELETE button on the side of the window.

3. FMIS EDS

After connecting (above #1) the WS_FTP CLIENT SCREEN will be ready to receive the FMIS EDS File. Highlight the appropriate EDS Data file with a click on the left window and press the arrow button pointing to the right window. When the FTP Server receives the file, it will send that file to the mainframe programs for processing and return the results from the mainframe to the FTP Users directory in a file called "EDS.MES". The user may view this file or download it to extract the desired information about the FMIS Database load.

APPENDIX B
FEDERAL-AID FUNDING CONTROL PROCESS

APPENDIX C

PROJECTS TOOLBARS

The user can activate buttons that are highlighted on the toolbars at the top of the Project Header and Project Detail screens. Functions which cannot be performed will be grayed out (deactivated).

The buttons are:

Project Header

Open - To open an existing Project Status Record. Must enter Federal or State Project Number.

NewPrj - To add a new project. Must enter Cost Center and Project number.

Save - To save new entries or changes to a project record.

PickLst - To generate a list of projects which meet user-supplied selection criteria. A project may be selected for viewing (opened) from the picklist.

Hst - To generate an expenditure history of Federal Funds for the displayed project by program code.

Clse - To close a project when all work contracted to be performed is completed.

Reopn - To reopen a closed project.

Withdrw - To withdraw a project or a detail line of a project.

Reestab - To establish a withdrawn project or detail line of a project.

Conv - To convert Advance Construction funds to a Federal-aid Program.

Doc - To view Project Authorized/Agreement and Project Modification documents.

Sign - For user with signatory authority to approve new projects or changes to existing projects.

Home - To return to the top of the Project Header Information screen.

Detl - To access the Detail Summary at the bottom of the screen.

Project Detail

Save - To save new entries or changes to a project detail record.

Copy - To create a new Project Detail line by copying the current detail.

New Detail - To create a new Project Detail line.

Delete - To delete the current Project Detail line.

Prior - To display the previous Project Detail line.

Next - To display the next Project Detail line.

Reestablish - To activate a previously deleted Project Detail line

Detail History - To generate report FMISD03A which lists all funding changes to the Project Detail.

Home - To position cursor at top of Project Detail.

Bottom - To position cursor at the bottom of Project Detail.

NOTE: System messages are shown at the bottom of the screen.

APPENDIX E RESERVED FEDERAL PROJECT NUMBERS

- 1. Motor Carrier Safety Administration Program (MCSAP) Federal projects numbers are assigned as follows:**

GRANT PROGRAM	ALPHA PREFIX	FISCAL YEAR	STATE CODE	PROJECT NUMBER
Basic, Incentive, Reallocated	MC	##	##	1
High Priority	MH	##	##	1
MCSAP Border	MB	##	##	1
Crash Causation	CC	##	##	1
CDL	CD	##	##	1
ITS/CVO	IT	##	##	1
Border Inspections	RB	##	##	1

- 2. Pooled Funds Statewide Planning and Research and National Cooperative Highway Research Projects are assigned as follows:**

- Prior to FY 2001, the first four characters assigned were “0001” through “0005” and the last three characters were sequential.
- As of FY 2001, the first four characters assigned were “TPF5” and the last three characters are sequential.

APPENDIX F
IMPROVEMENT TYPE CODES

Improvement Type	Description
01 – New Construction Roadway	Construction of a new roadway that will not replace an existing roadway. A new roadway will provide: (1) a roadway where none existed, or (2) an additional and alternate roadway to an existing roadway that will remain open and continue to serve through traffic.
03 – 4R Reconstruction, Added Capacity	Construction on approximate alignment of an existing route where the old pavement structure is substantially removed and replaced. Such reconstruction includes widening to provide continuous additional through lane(s), or adding, or revising interchanges, replacing other highway elements such as a grade separation to replace an existing grade intersection. Also included, where necessary, are other incidental improvements such as drainage and shoulder improvements.
04 – 4R Reconstruction, No Added Capacity	Widening the lanes and/or shoulders of an existing roadway without adding through lanes. This may include reconstructing the existing pavement and other incidental improvements such as shoulder and drainage improvements.
05 – 4R Resurfacing	Placement of additional surface material over the existing roadway to improve serviceability or to provide additional strength. There may be some upgrading of unsafe features and other incidental work in conjunction with resurfacing. Where surfacing is constructed by a separate project as a final stage of construction, the type of improvement should be the same as that of the preceding stage B new route, relocation, reconstruction, minor widening, etc.
06 – 4R Restoration and Rehabilitation	Work required to return existing pavement (including shoulders) to a condition of adequate structural support or to a condition

Improvement Type	Description
	adequate for placement of an additional stage of construction. There may be some upgrading of unsafe features or other incidental work in conjunction with restoration and rehabilitation. Typical improvements would include replacing spalled or malfunctioning joints; substantial pavement stabilization prior to resurfacing; grinding/grooving of rigid pavements; replacing deteriorated materials; reworking or strengthening bases or sub-bases, and adding under-drains.
07 – 4R Relocation	Construction of a roadway at a new location that replaces an existing roadway. The new roadway carries all the through traffic with the previous facility closed or retained as a land-service road only.
08 – Bridge, New Construction	Construction of a new bridge that does not replace or relocate an existing bridge.
*10 – Bridge Replacement, Added Capacity	Total replacement of a structurally inadequate or functionally obsolete bridge with a new structure constructed with additional lanes in the same general traffic corridor to current geometric construction standards. Incidental roadway approach work is included. The use of this code requires the reporting of the National Bridge Inventory (NBI) structure number in the data field identified Bridge Numbers.
*11 – Bridge Replacement, No Added Capacity	Total replacement of a structurally inadequate or functionally obsolete bridge with a new structure without adding lanes constructed in the same general traffic corridor to current geometric construction standards. A bridge removed and replaced with a lesser facility is considered a bridge replacement. Incidental roadway approach work is included. The use of this code requires the reporting of the National Bridge Inventory (NBI) structure number in the data field identified Bridge Numbers.

Improvement Type	Description
*13 – Bridge Rehabilitation, Added Capacity	<p>For the major work required to restore structural integrity of a bridge, as well as, work necessary to correct major safety defects. Bridge deck replacement (both partial and complete) and widening of bridges including addition of through lanes to specified standards are included.</p> <p>Construction of a dual structure to alleviate a capacity deficiency is also included. Work required to correct minor structure and safety defects or deficiencies, such as deck patching, resurfacing, protective systems, upgrading railings, curbs and gutters, and other minor bridge work. If HBRRP funds are involved, the use of this code requires the reporting of the National Bridge Inventory (NBI) structure number in the data field identified Bridge Numbers.</p>
*14 – Bridge Rehabilitation, No Added Capacity	<p>For the major work required to restore structural integrity of a bridge as well as work necessary to correct major safety defects. Bridge deck replacement (both partial and complete) and widening of bridges without adding through lanes to specified standards are included. Work required to correct minor structure and safety defects or deficiencies, such as deck patching, resurfacing, protective systems, upgrading railings, curbs, or other preventative maintenance items are included. If HBRRP funds are involved, the use of this code requires the reporting of the National Bridge Inventory (NBI) structure number in the data field identified Bridge Numbers.</p>
**15 – Preliminary Engineering	<p>For the preparation of plans, specifications, and estimates (PS&E), traffic, and related studies including field inspections, surveys, material testing, and borings.</p>

Improvement Type	Description
16 – Right of Way	For purchase of land, improvements and easements, in addition to the cost of moving and relocating buildings, businesses, and persons.
**17 – Construction Engineering	Oversight of construction of roadways, structures, and traffic services facilities including additional design work after construction project is let.
18 – Planning	For Planning related purposes.
19 – Research	For Research related purposes.
20 – Environmental Only	For improvements that do not provide any increase in the level of service, in the condition of the facility or in safety features. Typical improvements, which would fall in this category, would be noise barriers, beautification and other environmentally related features not built as a part of any other improvement type. If environmental mitigation is needed as the result of a bridge project, and it is confined to the reasonable touchdown and the bridge itself, then this is allowable with HBRRP Funds. Outside the reasonable touchdown would not be considered eligible.
21 – Safety	For projects or a significant portion of a project that provides features or devices to enhance safety. For example, expenditures on projects designed to improve the safety of at-grade railroad crossings or for the construction of facilities dedicated to the enforcement of vehicle weight regulations.
22 – Rail/Highway Crossing	Improvements to crossing warning Protective Devices such as signs, markings, and cross bucks; flashing light additions/improvements; and improvements to track circuitry.
23 – Transit	For transit and transit-related purposes.

Improvement Type	Description
24 – Traffic Management/ Engineering - HOV	Traffic operation improvements that are designed to reduce traffic congestion and to facilitate the flow of traffic, both people and vehicles, on existing systems, or to conserve motor fuels. Include automated toll collection equipment, road and bridge surveillance and control systems, etc.
25 – Vehicle Weight Enforcement Program	Vehicle Weight Enforcement
26 – Ferry Boats	Ferry Boats
27 – Administration	Administration for National Recreational Trails Projects, Commercial Vehicles, and other similar projects.
**28 – Facilities for Pedestrians and Bicycles	For independent projects (not part of any other Federal-aid Highway project) to construct a facility to accommodate bicycle transportation and pedestrians.
**29 – Acquisition of Scenic Easements and Scenic or Historic Sites	For projects consisting of easement and fee-simple purchase of sites of historic significance and/or considered worthy of preserving due to their scenic qualities within the view shed of a transportation facility.
**30 – Scenic or Historic Highway Programs	For projects consisting of scenic highway program and implementation activities not included in safety and other related improvements.
**31 – Landscaping and Other Scenic Beautification	For projects involving landscaping and other scenic beautification through planting and related work. This includes vegetation management to assure the sustainability of landscape areas.
**32 – Historic Preservation	For projects consisting of purchasing and restoring/rehabilitating a building, structure, or facility (other than transportation buildings, structures and facilities) that is directly related to the transportation system.

Improvement Type	Description
**33 – Rehabilitation and Operation of Historic Transportation Buildings, Structures, or Facilities	For projects consisting of purchasing and restoring/rehabilitating, and/or operating transportation buildings, structures, or facilities considered to be of historic significance.
**34 – Preservation of Abandoned Railway Corridors	For projects to preserve an abandoned railway corridor. It is expected that most of these projects will accommodate bicycle and pedestrian use. This code may be used for any railway corridor conversion project including those used by equestrians, skaters, and skiers. Not to be used for National Recreational Trails projects.
**35 – Control and Removal of Outdoor Advertising	For projects to purchase outdoor advertising for permanent removal, to remove illegal outdoor advertising, or to develop an outdoor advertising control plan.
**36 – Archaeological Planning and Research	For projects involving the identification, evaluation, planning, and/or research of historic or archaeological planning and research under Transportation Enhancements.
**37 – Mitigation of Water Pollution due to Highway Runoff	Mitigation of Water Pollution due to Highway Runoff.
**38 – Safety and Education for Pedestrians/Bicyclists	Safety and Education for Pedestrians and Bicyclists
**39 – Establishment of Transportation Museums	Establishment of Transportation Museums.
**40 – Special Bridge	This category includes bridge inventory, inspection and classification and other special bridge projects, such as load posting, not covered by another type of improvement code.
**41 – Youth Conservation Service	Youth Conservation Service
42 – Training	Training; Supportive Services; TRAC; On the Job Training
43 – Utilities	Utilities

Improvement Type	Description
44 – Other	Miscellaneous work such as National Recreational Trails construction, noise barriers, etc.
45 – Debt Service	Interest payments and retirement of principal under an eligible bond issue (including capitalized interest) and any other cost incidental to the sale of an eligible bond issue (including issuance costs, insurance or other credit enhancement fees, and other bond-related costs as determined).

* Projects using these Types of Improvement must report a National Bridge Inventory Structure Number.

** Transportation Enhancement Projects (Program Codes with fund source 33B0, Q220) must use these Types of Improvement.
